

# Graduate Students in Math, Engineering, English and Psychology are invited to participate in NEUROIMAGING RESEARCH

## What you get

- \$20
- a picture of your brain
- a brief neuropsychological screening
- the joy of contributing to our knowledge of the human brain

## What you do

- have your brain scanned in an MRI
- do some math-related and english-related tasks
- take a brief IQ, math, and reading test
- two visits, approximately two hours total

## What we learn

- whether there are differences in brain structure and brain functioning between math/science experts and language experts
